

LION

LION MACHINE PVT. LTD.

Rapid Sugarcane Juicer

This is what makes this machine a favorite with everyone who wants to use a sugarcane machine for commercial purposes. Even the rollers used are food grade stainless steel, whereas other machine manufacturers settle for MS (Mild Steel) rollers. Rust free & durable, the product works without much maintenance or upkeep. So, as a businessman you keep making profit and do not have to keep doling out for overheads. The machine is pretty compact and can be placed right in front of the customers. The customers always prefer to see the whole process in front of them which kind of builds in confidence and of course improves sales.

The product is exceptionally cost-effective, operating at just $\frac{1}{2}$ HP (400 Watts). This translates to minimal electricity usage, sparing you from hefty bills at the end of each month. It's a crucial factor to meticulously weigh when selecting a machine, as it essentially equates to saving rather than splurging on expenses.

Technical Specifications

Model
Rapid

Size
450 x 250 x 360

Lion Micro Sugarcane Juicer gives utmost hygiene and ease of extracting juice at your home. Its heavy duty structure and food grade material ensures durability and best quality. For enhanced safety measures, an emergency stop button has been installed to facilitate immediate action whenever necessary. This robust motor operates quietly, offering a serene environment while juicing, eliminating noise concerns. Its direct geared drive delivers ample power for efficient squeezing, preventing sugarcane jams. Engineered for easy cleaning, this machine requires no cumbersome tools, making it suitable so you can use this machine at home, restaurant, hotels, juice shop and more.
